Javascript & Frontend Developer | Professional Enthusiast | Constant Learner

– Solution oriented Frontend Developer, experienced in web-development and user experiences
– Proficient with communication skills and high level English language proficiency
– A developer with a deep understanding of front-end libraries and frameworks such as React.js and Next.js through solid Javascript fundamentals and knowledge of algorithmic principles.
– Successfully contributed to global projects and helped them achieve success
Interested in: Programming | Agile Development | Software Engineering | Debugging |Problem solving

TECHNICAL SKILLS

- Javascript | Typescript | React.js | Next.js | Basics of Express.js
- Tailwind CSS | Redux toolkit | Zustand | React query | Effective usage of main React Hooks | SWR WebSockets (Socket IO) | GitHub | Axios | Working with UI libraries | Internalization Libraries

PROFESSIONAL EXPERIENCE

Frontend Developer| WISHX (wishx.me) - Wilmington, DE   **August 2023 – Present**
- The project was developed from scratch using Next.js 13 for efficient server-side rendering and static site creation, and TypeScript to avoid potential errors during compilation. Used Tailwind CSS for fast development in styling
- Used Zustand for lightweight, scalable state management, which running both client and server side.
- Proposed an infinite scrolling approach instead of pagination. We kept the first incoming data as "SSR" to avoid delaying the incoming data during infinite scrolling.
- Integrated Stripe for secure and efficient payment processing.
- Search, filter and tab sections are handled in the entire project by Custom Hook.
- *Technology Used*: **Main** – Next.js 13, Typescript | **CSS** – Tailwind CSS | **State management** - Zustand | **Payment** - Stripe | **Notifications** - Pusher JS | **Forms** - Formik | **Validation** - Yup, **UI** - Material UI

Frontend Development Intern | QMETER - United Arab Emirates   **June 2023 – August 2023**
- I collaborated with the team on a pivotal project aimed at upgrading the CRM systems of companies for collecting and analyzing customer feedback.
- As part of this initiative, we replaced outdated stacks with modern technologies while simultaneously addressing bugs in the previous version
- My main and interesting task was implementing changes to a particular client's CRM system using env files, ensuring seamless integration without disrupting the other clients system
- This experience boosted my confidence in real-world problems and delivering solutions efficiently
- *Technology Used*: **Main** – React.js | **CSS** – CSS Modules | **State management** – Redux Toolkit | **UI** – Ant Design, **Charts**: Highcharts

EDUCATION

Azerbaijan State Economic University - Accounting & Audit **2017-2021**
