Frontend Developer | 1.5 + Year Experience | English proficient

---

SKILLS

SOFT • Proficiency in English, Good communcation skills, Team player, Patience, Focus
MAIN • Algorithmic principles | Javascript | Typescript | React.js | Next.js | Basics of Express.js
THIRD PARTY • Tailwind CSS | Redux toolkit | React query | Zustand | SWR | WebSockets (Socket IO) | Git | Axios | Working with UI libraries | Internalization Libraries

---

PROFESSIONAL EXPERIENCE

FROMFOLIO - Frontend Developer
March 2024 – Present | **Full-time**

- Utilized advanced Next.js 14 functions extensively, using its capabilities to ensure optimal performance and seamless user experience
- Implemented JWT for secure and stateless authentication in the project.
- Used React Query to manage client-side data fetching efficiently, especially in scenarios involving infinite queries
- Applied optimistic updates strategy to avoid flashes and user interactivity delays for enhancing user satisfaction and engagement with advantages of server actions
- Led the transformation of previously disorganized and suboptimal code into a cohesive and streamlined architecture, for improved readability, maintainability, and scalability.
- Used Shadcn UI kit and Tailwind CSS for fast development in styling

----

WISHX (wishx.me) - Frontend Developer
August 2023 – March 2024 | **Remote**

- The project was developed from scratch using Next.js App router for efficient server-side rendering and TypeScript to avoid potential errors during compilation.
- Used Tailwind CSS for fast development in styling, Zustand for lightweight, scalable state management.
- We kept the first incoming data as "SSR" to avoid delaying the incoming data during infinite scrolling.
- Integrated Stripe for secure and efficient payment processing.

QMETER - Frontend Developer Intern
June 2023 – August 2023 | **Full-time**

- As part of this initiative, we replaced outdated stacks with modern technologies while simultaneously addressing bugs in the previous version
- My main and interesting task was implementing changes to a particular client's CRM system using env files, ensuring seamless integration without disrupting the other clients system
- This experience boosted my confidence in real-world problems and delivering solutions efficiently
